

Quarterly **GIVEAWAYS**

Dial Bore Gage and Setting Fixture Combination from Sunnen

All members who join or renew between **January 1 – March 31** will have a chance to win a **Dial Bore Gage and Setting Fixture Combination from Sunnen!**

Sunnen GR-2121 Dial Bore Gage makes measuring engine cylinders and other bores a simple task. It features all-carbide gaging points, wear-proof ball crank, and adjustable centralizers, while covering the range of 2" to 6" with a .0001" readout. Comes packed in its own sturdy box with all tools and wrenches required for setup and adjustment.

Sunnen CF-1126 Setting Fixture multiplies the usefulness of the GR-2121 dial bore gage by allowing fast setup without the need for micrometers or ring gages. Features a heavy, stress-relieved, cast-iron base; lapped carbide micrometer anvils; and built-in magnifier for fast, accurate setup. Comes with its own master calibrating ring.
