

# VOCATIONAL EDUCATION WORKSHOP

All vocational school instructors are invited to attend a **FREE** workshop at PRI 2016, featuring presentations by leaders in training technology and engine building instruction.

**PRI 2016**  
Indianapolis  
December 8-10, 2016

**December 9**  
**2-4pm**  
**Convention Center**  
**Room 238**

## **Wendy Farrell**

Wendy Farrell from Lionbridge Technologies Inc. will be discussing “Augmented Reality” as a unique training tool. Access to mobile devices provides a unique opportunity to support performance in entirely new and more effective ways. Augmented Reality is the link that enables you to deliver your valuable resources directly to your technicians, students, and customers when they need it most.

## **Dave Capitulo and Gary Lewis**

Dave Capitulo from DeAnza College and AERA Director Gary Lewis, author of “Automotive Machining & Repair” will share their wealth of knowledge about what training practices they use to stay current, and how shops can find future technicians.

In addition to the presentations, there will be door prizes and other free gifts for those who attend the workshop.
